 accuracy 2% when <300ppm
 5% when 300-800 ppm
 10% when >800 ppm
 Stainless Steel Probe
 3V Lithium CR2032
 5 years/ 10000 measurements
 150 x 27 x 17mm
 weight 40g

Change Abolition of the red light -- TDS-NEW

Welcome to Ask
alan@sennotek.com

Whether my clients,
 or customers want
 to sell this product.

WHY?

AREAS WITHOUT TAP WATER

Today there are still many areas of the drinking water from groundwater, well water, river and seawater. Usually, after processing by reverse osmosis, the TDS value will still be higher than 40 ppm.

PROVISIONS

IN SOME COUNTRIES

The TDS value of drinking water regulations in some countries must be higher than a certain value.

NEED OF RED ALERT?

In order to avoid these areas of doubt, we decided to abolish the red light. The same for my dealer or customers who want to sell this product.
